ONÉSIME BERNARD

I am a computer science and mathematics student at Université Paul Sabatier de Toulouse. I previously studied engineering at the École Polytechnique de Louvain in Belgium. Science fascinates me and I love to learn new stuff. My interests lies primarily with computer simulations and how to solve real-world problem with procedural solutions. To that end, i like to tinker with artificial intelligence and more conventional algorithms.

SKILLS

Programming

- **Python** ●●●●○
- **Bash** ●●●●○
- **LaTeX** ●●●●○
- **C/C++** ●●●○○
- **Relational Databases** ●●●○○
- **R/Matlab** ●●●○○
- **OCaml** ●●○○○
- **Java** ●●○○○
- **OpenGL/WebGL** ●○○○○
- **HTML/CSS/JS** ●○○○○
- **Unity/UE5** ●○○○○

Operating Systems

- **Linux** ●●●●○
- **Windows** ●●○○○

Software & Tools

- **Data Visualisation** ●●●●○
  (matplotlib, ggplot, webGL)
- **Data handling/analysis** ●●●○○
  (numpy, scikit-learn, pandas)
- **Powerpoint** ●●●●○
- **Blender** ●●○○○

Languages

- **French** ●●●●●
- **English** ●●●●○

OTHER

Driving Licence (B)
Red Cross First Aid

WORK HISTORY

09/2022 -
Lerti, Grenoble
Software developper

Design of tools for extracting and analyzing computer media for forensic purposes. Automated processing of audio, video and text data by artificial intelligence to support the analyst's work.

EDUCATION

2015 - 2018
École Polytechnique, Louvain
Bachelor of Engineering

2018 - 2022
Université Paul Sabatier, Toulouse
Bachelor of Computer Science

2018 - 2022
Université Paul Sabatier, Toulouse
Bachelor of Mathematics

ACADEMIC EXPERIENCE

- CIMI Artificial Intelligence Summer Camp
- Internship at the Research Institute in Computer Science of Toulouse

SOME OF MY PROJECTS

- R library of bandit algorithms in a functional style. They are a family of AI algorithms focused on iterative experience and "expensive" to collect input data.
- Blender addon to transform a 3D model produced by photogrammetry software into real-world, east-north-up space.
- My portfolio website made in vanilla javascript. Features a real-time boïds simulation written in webGL.
- A collection of travelling salesman algorithms implemented in C.

GENERAL SKILLS

openMP | Posix Multithreading | Functional Programming | Discipline | Object Oriented Programming | AI Algorithms | Self-sufficiency

INTERESTS

- Cycling
- Formula 1
- Mathematics
- Aviation
